

Tell what class of the food chain an organism belongs to.

Tell what class of the food chain an organism belongs to.

Draw a food chain thinking of a specific examples. It could be something familiar: your cat ate a mouse that got into the potato chips. It could also be less familiar: a lion ate a zebra that ate the grass. Try to see how long you can make the food chain.

Zoology 6 Information Pieces

Seed Producing Plants z-6	Mice z-6	Sharks z-6
Mushrooms z-6	Deer z-6	Owls z-6
Plankton z-6	Cows z-6	Cats z-6
Grass z-6	Surgeon Fish z-6	Coyotes z-6

Secondary Consumers z-6
Primary Consumers z-6
Producers z-6

To Make Your **MatchCard** more durable:

1. Put the student MatchCard and instructor MatchCard back to back in a clear plastic page protector.
2. Laminate the information pieces. Or you can make them sturdier by covering the paper with transparent tape prior to cutting the pieces out.
3. For more ideas on how to use the MatchCards, and for keeping a notebook for review, see the Instructor's Guide.
