

Identify the function of the different parts of seaweed.

Identify the function of the different parts of seaweed.

Other activities with seaweed: 1) Make sushi with sheets of seaweed, sushi rice, and cream cheese. 2) Make a collage with pictures of fish on poster board, and pieces of seaweed on top. 3) Make a nature notebook of seaweed found locally.

Collect different kinds of seaweed. Draw and label the parts. Notice the differences in size and shape, yet all have the same parts which perform the same functions. If not readily available in your area, you should be able to get seaweed from a local aquarium or pet shop.

Oceanography 5 Information Pieces

Holdfasts 0-5
Stipe 0-5
Floats 0-5
Blades 0-5
Anchor the seaweed to the ocean floor 0-5
The stalk of the seaweed which varies in size and thickness 0-5
Hollow parts of the seaweed which allow the plant to stay buoyant 0-5
Photosynthesis occurs on the surface to produce oxygen from sunlight 0-5

To Make Your MatchCard more durable:

- 1. Put the student MatchCard and instructor MatchCard back to back in a clear plastic page protector.*
- 2. Laminate the information pieces. Or you can make them sturdier by covering the paper with transparent tape prior to cutting the pieces out.*
- 3. For more ideas on how to use the MatchCards, and for keeping a notebook for review, see the Instructor's Guide.*
